RI TRANSPARENCY REPORT

2020

Milford Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Investment markets are in a state of constant change, therefore we believe clients' interests are best looked after by taking an active approach to investing. This allows us to take advantage of investment opportunities as they arise and manage risk along the way. The key principles that underpin our philosophy are:

1. We adopt an active portfolio management approach.
2. We take advantage of investment opportunities as they arise and seek to minimise downside risk when markets are less favourable.
3. We seek to manage both growth and risk and will proactively alter our investment strategy if our view of the market, a company's management, or trading conditions changes.
4. We are responsible investors and through active engagement have an ability and capacity to influence company policies and use our voice as an engaged shareholder to drive positive change.
5. We believe in the value of doing our own investment research and are committed to conduct regular company visits.
6. We seek to understand the changes in the local and global economic environments and how these changes are likely to impact the markets in which our clients' assets are invested.
7. We seek to manage risk through appropriate portfolio diversification.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

In its fiduciary role, and as a responsible asset management company, Milford integrates environmental, social, and governance (ESG) analysis into its investment decision making process across all Funds. We believe that ESG issues can affect the performance of investment portfolios (to varying degrees across companies, sectors, regions, asset classes and through time). We also believe that ESG issues can be identified and assessed at the individual company level and integrating ESG analysis across all portfolios allows for a better analysis of ESG risk and opportunity than relying solely on positive and negative screening processes. It promotes consideration of companies which provide positive ESG benefits in addition to the required financial return.

SG 03.1

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2

Describe your policy on managing potential conflicts of interest in the investment process.

The Milford Group's approach to conflicts of interests is to consider each potential conflict on its own merits and then to:

- recognise the conflict;
- discuss with management;
- assess the impact of the potential conflict;
- avoid (if possible) or manage the conflict; and
- disclose the conflict.

Any conflict of interest is also recorded in a central database for conflicts of interest and reviewed on a regular basis.

We have in place a process with the Supervisor for identifying, notifying and certifying or obtaining consent for related party transactions as required by the FMCA.

In 2019, Milford employed a Responsible Investing Analyst, whose role is to support the Analyst and Portfolio Manager's incorporation of ESG factors into the investment process, co-ordinate proxy voting and further strengthen Milford's Responsible Investing approach.

Analysts are responsible for ensuring ESG analysis is up to date and included in internal research reports for any investments they cover. Analysts are accountable to portfolio managers. Portfolio managers are formally responsible for ensuring that ESG analysis is part of the investment process for their portfolio. Portfolio managers are

accountable to the CIO, who is in turn accountable to the Head of Investments, the CEO, and the Board of Directors for ensuring all RI policies are adhered to for their portfolios.

Milford PE focuses on investing in sustainable companies and business models which we believe will deliver strong investment performances over time. All other factors being equal, a private company with superior ESG factors would probably receive a higher recommendation.</p> <p>Considerable attention is also put on the governance structure of our investee companies. Milford PE seeks to improve boards where necessary for example by developing diversity of skillsets, and maintaining balance between founders/owners, executives and external directors.</p> <p>Milford PE does not necessarily exclude investment in companies purely due to low ESG performance. Any high risk ESG issues or areas of concern that are identified during investment analysis are discussed during the assessment process and are treated as one factor for consideration when making the decision to invest.</p>

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

Milford takes a whole-of-fund approach to ESG incorporation, employing both screening and integration strategies, with an emphasis on being an active, engaged manager.

First, Milford uses negative screening to exclude direct investment in companies involved in activities illegal in New Zealand, or which the New Zealand Government has signed an International Convention for (such as tobacco). Our mandate allows indirect investment in these entities via External Managers or ETFs, but we monitor these on a monthly basis against materiality thresholds. These indirect investments allow Milford to access certain investment themes without material exposure to the excluded activities.

Second, ESG factors are integrated into Milford's investment analysis across all Milford funds. This promotes consideration of companies which provide positive ESG benefits in addition to the required financial return. All other factors being equal, a company with superior ESG factors is likely to receive a more positive recommendation by the investment team. This approach was adopted due to our general belief that ESG issues can be identified and assessed at the individual company level. Integrating ESG into investment analysis across all portfolios allows for a better analysis of ESG risk and opportunity than relying solely on positive and negative screening processes. Where appropriate, companies will be engaged on ESG matters to encourage an improvement in their corporate behaviour.

(A) Implementation: Screening

LEI 04	Mandatory	Public	Descriptive	PRI 1
--------	-----------	--------	-------------	-------

LEI 04.1 Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Milford maintains an Exclusion List which excludes direct investment in entities that are directly involved in activities illegal in New Zealand, or which the New Zealand Government has signed an International Convention for (such as tobacco). For Milford's current Exclusion List, please see: <http://milfordasset.com/wp-content/uploads/2020/02/Published-Exclusions-List-Dec-2019-approved.pdf>

The exclusion applies at the company level. Trading in these entities is not possible as the ISINs are prohibited in Milford's trading system. The Responsible Investing Analyst conducts monthly reviews of Milford's investment holdings to ensure the exclusion list remains intact. This monthly review also monitors the level of indirect investments in these entities against previously determined materiality thresholds.

- Positive/best-in-class screening
- Norms-based screening

LEI 04.2 Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

As screening criteria are established based on illegal activities, or action taken by Government, Milford is guided by the actions of Parliament. Milford does not envisage imposing blanket restrictions on investing in any activity/industry unless New Zealand's Parliament passed laws or made significant public policy to ban/restrict those activities in New Zealand.

Milford's Exclusion List is reviewed monthly and any changes are subsequently updated on our website. The list is publicly available to our clients at their convenience.

Additional information [optional]

Milford is an active owner of the shares it holds. Engagement with companies is an important part of Milford's investment process and an integral element of our approach to responsible investment. Engagement is by analysts or portfolio managers in the investment team. Engagement is typically with the CEO, CFO, and other senior management of the company. It may take the form of face-to-face meetings, phone conversations, or written communication. The purpose of engagement is to provide insight into the quality of a company's management, strategy, operations, governance structure and approach to ESG issues. Engagement can also be prompted by recommendations from ISS, our proxy voting service provider, on upcoming resolutions that differ from management's recommendations, or prompted by our recent voting decisions or considerations. Engagement is undertaken pragmatically and subject to Milford's size of investment, resource, and ability to influence positive outcomes.

Milford's responsible investment policy gives broad examples of the environmental, social, and governance issues which Milford views as important. These issues largely represent the issues Milford would likely engage on with companies it invests in. From March 2020, Milford has also implemented an internal checklist all analysts must complete for each company they cover. This checklist and the subsequent rating received allows us to monitor ESG practices and performance of investee companies, relative to peers, and will also contribute to engagement activities.

Milford has standalone Conflict of Interest and Insider Information policies, which apply to all Milford employees at all times in the performance of their duties.

In the year to 31 December 2019 Milford did not outsource any active ownership activities to service providers, however, we are currently in the process of signing up with a research provider. The chosen provider also offers engagement services on behalf of users for a set number of global companies each quarter. As a client, Milford can have input in to the themes and/or companies targeted.

- Other (explain)
- We hire service providers who make voting decisions on our behalf, except in some pre-defined scenarios where we review and make voting decisions.
- We hire service providers who make voting decisions on our behalf.

LEA 12.2 Provide an overview of how you ensure that your agreed-upon voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

Milford is an advocate for strong corporate governance, shareholder rights and transparency. Our responsible investing approach is anchored in engagement and active actioning of our proxy voting provides us with another opportunity to influence company policies towards a more sustainable future.

Milford's custodian NAB provides access to the proxy voting services of ISS - Institutional Shareholder Services. They provide a voting platform and recommendations. Milford's Responsible Investing Analyst uses the ISS platform to notify the Investment Team of the upcoming vote. The recommendations of ISS are compared to the recommendations made by Company Management. Where the Investment Team wishes to vote against the recommendation of ISS, they must explain why they are taking this position. This record is kept on file by the Responsible Investing Analyst.

Bi-annual internal audits are carried out to ensure all corporate actions have been actioned and identifies any voting opportunities that may have been missed. Based on the audits of the voting activity for 2019, no votes were missed.

		100%

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

Milford takes a whole-of-fund approach to ESG integration whereby ESG analysis is included in the investment process in two ways. First, Milford uses negative screening to exclude direct investment in companies involved in certain activities that do not meet Milford's ESG requirements. Milford chooses to exclude these companies as they are engaged in activities which are illegal under New Zealand law or the New Zealand Government has signed on to a relevant International Convention (e.g. we exclude tobacco because of NZ's participation in the World Health Organisation's Framework Convention on Tobacco Control). Second, ESG analysis is integrated into investment analysis across all Milford funds. This approach was adopted due to Milford's general belief that ESG issues can be identified and assessed at the individual company level. Risks and opportunities related to ESG are not always fully reflected in the market price. Due to this, integrating ESG into investment analysis across all funds allows for a better analysis of ESG risk and opportunity than relying solely on positive and negative screening processes.

FI 03	Mandatory	Public	Additional Assessed	PRI 1
--------------	------------------	---------------	----------------------------	--------------

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
- None of the above

(A) Implementation: Screening

Norms-based screening	<input type="checkbox"/>	<input type="checkbox"/>	

FI 04.2 Describe your approach to screening for internally managed active fixed income

Milford maintains an Exclusion List which excludes direct investment in entities that are directly involved in activities illegal in New Zealand, or to which the New Zealand Government has signed an International Convention (such as tobacco). For Milford's current Exclusion List, please see: <http://milfordasset.com/wp-content/uploads/2020/02/Published-Exclusions-List-Dec-2019-approved.pdf>

The exclusion applies at the company level. PM's are precluded from direct investment (either equity or fixed income investment) in companies on the Exclusion List. Milford's Operations team acts on instructions from the Responsible Investing Analyst, confirmed by the Chief Investment Officer, to load the excluded securities directly into Milford's trading system so that any trading is prohibited. The Responsible Investing Analyst conducts regular reviews of investment holdings to ensure the exclusion list remains intact.

(C) Implementation: Integration

FI 10	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

FI 10.1 Describe your approach to integrating ESG into traditional financial analysis.

Per Milford's Responsible Investment policy, available research for an investment is reviewed by Milford analysts and/or portfolio managers as part of Milford's standard investment process. ESG analysis is incorporated as one of many factors that is assessed when analyzing potential investment opportunities. This includes analysing whether there are significant ESG risks/opportunities faced by the company, what impact they could have on the company, and how the company addresses those risks/opportunities.

Any high risk ESG issues or areas of concern that are identified from Milford's research are noted in internal research notes and discussed with portfolio managers during the investment process.

FI 10.2 Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

Corporate (financial)

Milford's approach to Corporate (Financial) fixed income relies on ratings and publications by ratings agencies alongside comprehensive internal research of the issuer by Milford analysts and portfolio managers. Analysts and portfolio managers use external sources to research the ESG concerns of an issuer as a factor for consideration when deciding whether to make an investment. Any specific ESG concerns that are identified may be discussed with the issuer.

Corporate (non-financial)

Milford's approach to Corporate (Non-Financial) fixed income relies on ratings and publications by ratings agencies alongside comprehensive internal research of the issuer by Milford analysts and portfolio managers. Analysts and portfolio managers use external sources to research the ESG concerns of an issuer as a factor for consideration when deciding whether to make an investment. Any specific ESG concerns that are identified may be discussed with the issuer.

Corporate (financial)

Analysts and/or portfolio managers perform a comprehensive analysis of issuer information and economic conditions when assessing Corporate (Financial) fixed income investments. One aspect of this focusses on the operations and activities of the issuer and whether it gives rise to any ESG concerns. This focusses on the issuers reputation and policies relating to ESG matters. Where appropriate, any concerns identified may be discussed with senior management to better understand the area of concern and how it impacts the overall investment thesis.
